

Your safety is our Top Priority.

We reassure you of the safety and security of your accounts.

We are aware of the recent court proceedings involving a former employee of the Bank and the subsequent media reports.

Our employee code of conduct is clear that unethical behaviour or illegal acts are not tolerated. Regarding all investigations, we co-operate fully with the authorities.

We take this opportunity to reassure customers of the safety and security of their accounts. Protecting our customers' information and finances is a responsibility the Bank takes very seriously. We continually invest in enhanced security monitoring and new technologies to strengthen our systems and processes.

The trust we have earned from our customers is one of the most important assets we have and we will never take it for granted.
